ABOUT ME

Passionate Full-Stack Developer with expertise in Next.js, Django, and TypeScript, specializing in building scalable and efficient web applications. Experienced in developing chatbots, task management systems, and AI-driven solutions. A proactive problem solver and continuous learner, always exploring innovative solutions in software development.

PROJECTS

It allows users to log in securely, add tasks with due dates and mark them as completed. With cloud-based storage using MongoDB Atlas, tasks are always accessible, and authentication is handled securely with NextAuth.

Task Manager - TickIT
Github Link

A disaster management system powered by machine learning to predict potential disasters based on historical data and real-time inputs. It integrates a Maps API to visualize past disasters worldwide, helping users analyze risk-prone areas.
